

# ZAMBEZI TENT SETUP

- 1) Open tent and lay out flat on ground
- 2) Peg the floor down using the peg straps (the back wall pegs most important at this stage)
- 3) Slide the ridge poles into loops
- 4) Put the main poles into position ( check detail in image No 4)
- 5) Place the bottom of main poles into pockets provided
- 6) Make sure the front door is open slightly (this allows air to flow in as the tent opens up)
- 7) Pull the tent up by pulling on the rally awning (latest version has handles for this operation)
- 8) Secure the centre pole on the veranda (the tent should now be standing by itself)
- 9) Tension up the other veranda guy-ropes (not fully at this stage)
- 10) Place the back poles and ridge poles into their loops and fix guy ropes. It is important to get the guy ropes positioned correctly (see drawing below).

All the guy-ropes can now be tensioned up as required.

inside should be

- Guy ropes - 8
- anchor pegs - 17
- main poles - 2
- back poles - 2
- veranda poles - 3
- ridge poles - 2 sets
